

**“POWDER COATED”
VALVE COVERS and AIR CLEANERS**

NOTE: The finish on these powder coated parts uses a state of the art finishing process using high quality polyester TGIC powder coat finish.

DO NOT USE HARSH CHEMICALS such as brake cleaner or carburetor cleaner. These kinds of cleaners will damage the finish. A mild soap detergent (such as dish detergent) or “Simple Green” will do an excellent job to clean your powder coated part.

DO NOT USE SCRUBBING PADS such as steel wool or “Scotch-Brite” on the exterior of your powder coated part.

Polishing : You may choose to polish your powder coated parts. Use a quality polish such as Meguiares #34.
